

Stiffener ACC-14

Lamination-Accessories

Version: A1

Product Description

ACC-14 is a PTFE-impregnated glass cloth which stabilizes the press package during lamination thus making it an excellent tool in the production of flexible circuits.

The PTFE-impregnation also provides good release properties.

ACC-14 gives best results in combination with VENTEC release films and press pad materials.

Product Data	
Thickness	0,13 mm
Colour	light brown
Temperature resistance	up to 260 °C
Usability	multiple (depending on application)

Availability

ACC-14 is available from stock, standard width is 1.300 mm ± 30 mm, length of rolls 50 m, other roll lengths and cut-to-size panels available upon request.

Cutting and Punching Service

ACC-14 can be supplied in any size either with or without registration holes. Both services (cutting and punching) can be offered with competitive prices and short delivery times.
